

Southeast Michigan's Low Voltage Wiring Experts

Commercial enterprises and homeowners alike count on reliable and speedy networks every day of every week. There's no time for inefficiencies or costly interruptions in your networks—that's why you need structured cabling planned by experts in low voltage design.

You need a true networking professional when you're installing security cameras, telecommunications solutions, AV cables, or home networks. Peekaboo Security Cameras can organize your cabling for optimal performance and easy maintenance for the future.

Commercial Low Voltage Wiring

At Peekaboo Security Cameras, we strive to do it right once. We understand that a well-engineered low-voltage infrastructure plays a critical role in your daily operations. So whether you need wiring for internet connections, telecommunications, security networks, or all of the above, we have you covered with first-rate wiring expertise.

Our commercial low voltage wiring services include:

- Structured cabling
- Ethernet and VoIP solutions, including Cat5e & Cat6 cabling
- Fiber optic cabling
- Security wiring

Residential Low Voltage Wiring

As the home becomes ever smarter and ever more integrated, the demands we make on it increase. These demands make expert low voltage wiring an essential part of new home construction and remodeling. Our team thoroughly understands the unique challenges of creating a durable and stable low voltage infrastructure in the modern home.

We can help you create the ideal environment for handling features such as:

- Security systems, including cameras and motion detectors
- Intercoms and electric doorbells
- Telephone and TV cabling, including internet connectivity
- Fiber optic cabling

Choose the Right Low Voltage Contractor

From the telecommunications lines that keep your company running smoothly to the network of security devices that keep your home safe, we have the networking know-how to get the job done right the first time. Peekaboo Security Cameras delivers best-in-class networking and wiring solutions for jobs big or small, commercial or residential.

We can set up connections in new constructions, complete new office build-outs, or optimize existing lines. Plus, when you choose us, you gain support for the future—meaning you can stay ahead of today's complex IT systems and business demands.
